

Technical parameters

- 1) Power Supply: AC220V \pm 0% 50HZ
- 2) Driven motor: DC brushless motor (standard edition)
DC brush motor simple edition 140W/36V
- 3) Motor rotational speed: 1600rpm
- 4) Operating environment temperature: -15°C 60°C
- 5) Relative humidity: \leq 90% no dense
- 6 Input port: 12V level signal or pulse wide 100ms
12V pulse signal Current $>$ 10mA
- 7 Communication port: RS485 electric equipment standard.
- 8 Communication coverage \leq 1200m
- 9 Passage width \leq 700mm
- 10 Passing speed: 50 persons / min (normally-opened mode).
30 persons / min (normally-closed mode).
- 11). Material: SUS304.
- 12). Weight: 70KG 13). Colour:
option
- 14). Applicable site: It can widely used at hotels, factories and mines,
residence area, clubs, enterprises and so on, these occasion that needs
carry out intelligent manage to the access.
